PRODUCT INTRODUCTION

Green-Strike USB/LED Indoor Mosquito Trapper uses UV light and a suction fan to attract mosquitoes.

- Modern and patented design and appearance
- Easy to disassemble and clean.

WORKING PRINCIPLE

This product uses a LED light source to produce 365nm light wavelength, which is loved by mosquitoes. Powered by USB, allowing you to connect this device with an adapter, power bank, computer, or any device with a USB port. Soft, low-light, making the room more dazzling.

Elegant and efficient design that integrates seamlessly with your indoor décor.

The mosquitoes are attracted to the light source, and the strong suction generated by the fan which quickly pulls them into the trapping cage located in the base of the product.

This product works best for catching mosquitoes, fruit flies, gnats, and small moths.

Compact, lightweight, and portable.

IDEAL FOR USE

Indoor: bedroom, study, living room, bathroom, restaurant, hotel, conference rooms, offices, etc.

Outdoor: outdoor tents, dining tents, sheds, garages, and other enclosed spaces that are away from moisture.

Works best when used in a low light environment.

For best results, continuously operate the trapper for 3 to 5 days. Place the trapper approximately 1 meter above ground.

Simply dispose of insects in trash bin and rinse with soap and water. Turn off other surrounding lights when attracting mosquitoes, making sure the mosquito trapper is the only light source.

CLEANING AND DISASSEMBLY METHOD

Wash and clean the bottom trapper portion.
Do not immerse the top portion in water.

PRODUCT WARRANTY

Green-Strike warranties to the original purchaser that this product is free from defective materials and workmanship. This warranty is limited to remedy defective part for a period of one (1) year from date of purchase. Retain your original receipt as proof of purchase.
